

**Pegbeast! Cardborg! Cake! Go! Kahoots PSP minis is available to download now from PlayStation Store.**

London, UK 1<sup>st</sup> Oct 2009 – Honeyslug are delighted to announce the launch of Kahoots for PSP as one of the inaugural PSP minis titles. Kahoots is a 50 level puzzle game where you control the blocks that form the floors to create a safe path to the exit for your Kahoot. Along the way there are special blocks which can help you to find your route home, but there are also traps which can harm the Kahoot as well as the Cardborg who will make their journey as tricky as possible. As well as finding the way out, there are Cakes to collect and awards to be won as well as a peek into where the Kahoots get up to when they reach an exit. Don't worry if you get stuck, you can always rely on the Pegbeast's songs to help you on your way!

Kahoots is available for all PSP models and is out today in Europe and Middle East for the princely sum of £2.49/€2.99/\$4.29 on the minis area of the PlayStation Store, with Australasia and Americas to launch during October.
